

Dear Sir,

Following the latest review by Miyamoto, Nelson and Alouf of this case report, we are submitting it again, after revieweing and correcting the points highlighted by Nelson.

We have also taken into account those suggested by her in "Discretionary Revisions", but would like to point out, as she suggests, that they are "dependant on the editorial requirements of the journal".

We also would like to thank the three reviewers for their support and help.

Yours sincerely,

Fernando Isaza.
