Title: Metabolic Effects of Low Glycaemic Index Diets

Version: 1 **Date:** 16 January 2008

Reviewer: Dan Cheta

Reviewer's report:

Report on

"Metabolic Effects of Low Glycaemic Index Diets" (Radulian G, Rusu E, Dragomir A, Posea M)

Basically, the above-mentioned text represents a general review, including new data and interesting concepts from the metabolic field. I think that its content will be useful for a large number of readers. The article seems well written and balanced.

But, before publishing it's necessary an improvement with respect to the following two points:

1. The language mistakes: "glycaemia" and "glycemia", "insulinaemia" and "insulinemia", the name of the journal (Ref 12) a.s.o.
2. The permission to reproduce Figure 2 or other reasonable solution.
