

Reviewer's report

Title: Developmental variations in plasma leptin, leptin soluble receptor and their molar ratio in healthy infants

Version: 1 **Date:** 23 January 2007

Reviewer: Ingrid Kohlstadt

Reviewer's report:

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Please discuss the application of this extremely specialized work in the field of neonatal endocrinology to the broader field of nutrition, so that this meticulously researched manuscript can be of sufficient priority for publication in this journal.

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
