

Reviewer's report

Title: Use of Dried Blood for Measurement of Trans Fatty Acids

Version: 2 **Date:** 16 April 2009

Reviewer: Prema Ramachandran

Reviewer's report:

The manuscript clearly describes a method of dry spot blood collection which gives comparable result with the classical blood collection. This dry dot method will be useful for field collection of samples in developing countries

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
